EDUCATION

Mindanao State University - Iligan Institute of technology, College of Computer Studies **2022 - Present**

Andres Bonifacio Ave, Iligan City, Lanao del Norte

Bachelor of Science in Computer Science

Relevant Coursework: Data Structures and Algorithms, Information Management, Human Computer Interaction, Applications Development and Emerging Technologies, Software Engineering, Introduction to Artificial intelligence

Bachelor of Science in Computer Applications (shifted program)

Relevant Coursework: Basic Computer Instrumentation and Measurement, Digital Techniques Fundamentals, Fundamentals of Computer Applications 1, Fundamentals of Computer Applications 2

PROFESSIONAL EXPERIENCE

Frontend Developer - Intern, Anura Innovations **June 2025 - July 2025**

- Designed and developed the frontend of a production-level web application used by the company.
- Independently built the frontend of a mobile applicaton from scratch.

PROJECTS

AntHill, *Software Engineering*

- A final group project for our Software Engineering course. a web-based platform that connects students with part-time, on-the-job training (OJT), and one-time job opportunities from companies. The platform allows students to create profiles, browse job listings, and apply directly, while companies can post openings and manage applications.
- **Tools used:** Python Flask, Bootstrap, HTML, CSS, Javascript, MySQL, Git

Student Contribution Payment System, *Information Management*

- A Java application that serves as a static payment collection system that focuses on minimizing the interaction between the collector and officer in charge of financial management.
- **Tools used:** JavaFX, CSS, MySQL

Emergency Resource Allocation using Genetic Algorithms, *Introduction to Artificial Intelligence*

- A system that uses genetic algorithms to optimize emergency resource allocation and reduce response times during disasters. It finds the best solutions by simulating different allocation strategies.
- **Tools used:** Python

Votility, *Computer Programming 2*

- An online voting system application designed to enhance voter accessibility and election security for institutional use. The system features real-time vote tracking and authentication mechanisms.
- **Tools used:** Qt Creator, MySQL, C++

Power Supply, *Fundamentals of Computer Applications 2*

- Designed and assembled a working power supply unit (PSU), demonstrating understanding of hardware components, electrical circuits, and voltage regulation.
- Applied basic electronics and safety practices to ensure proper functionality and compatibility with computer systems.
- **Tools used:** Soldering tools, Circuit Diagrams, Electrical components, Multimeter

SKILLS

Languages: C++, C, SQL, Python, JavaScript, Java, Processing, LaTeX, TypeScript

Technologies/Frameworks/Tools: MySQL, SQLite, React, Tailwind CSS, Bootstrap, Flask, JavaFX, Qt Creator, Git, Figma, Postman, Next.js
